# SHARED DATA WAREHOUSE

**Contract Placement**

**Contract Administration**

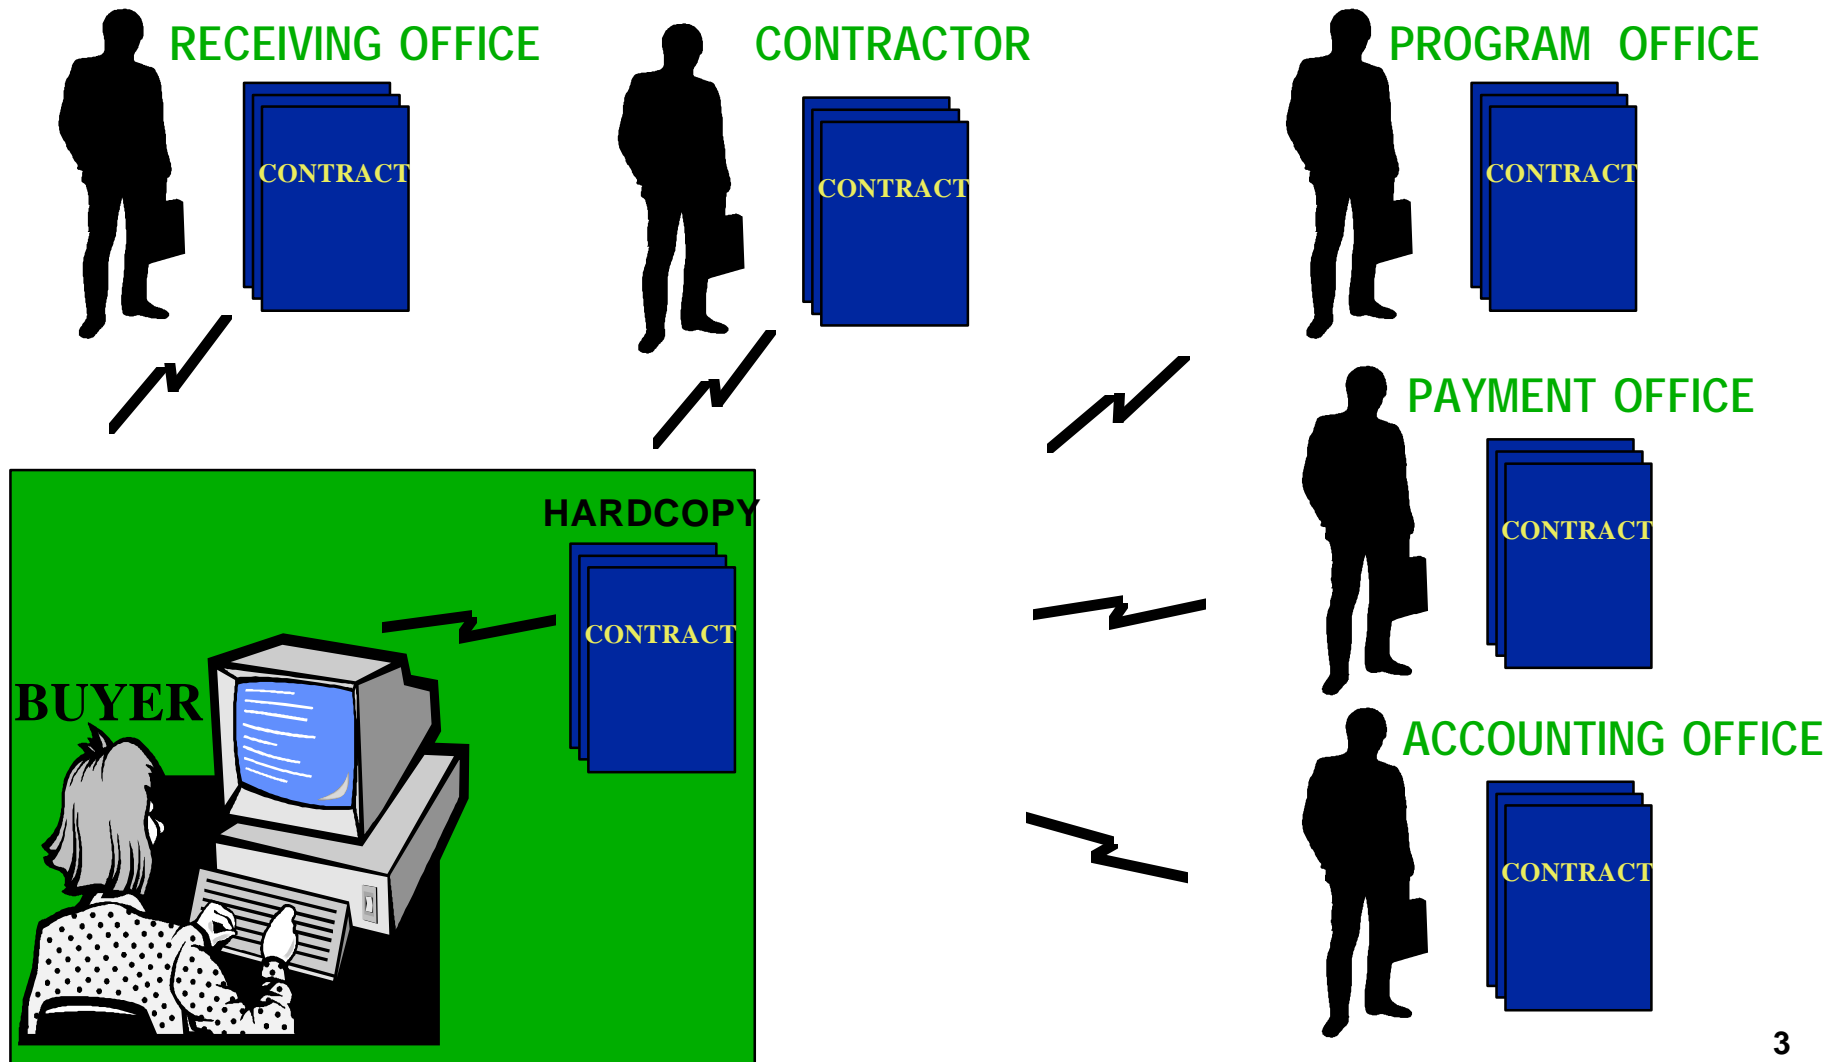

**Contract Payment**

## Contract Printed & Mailed

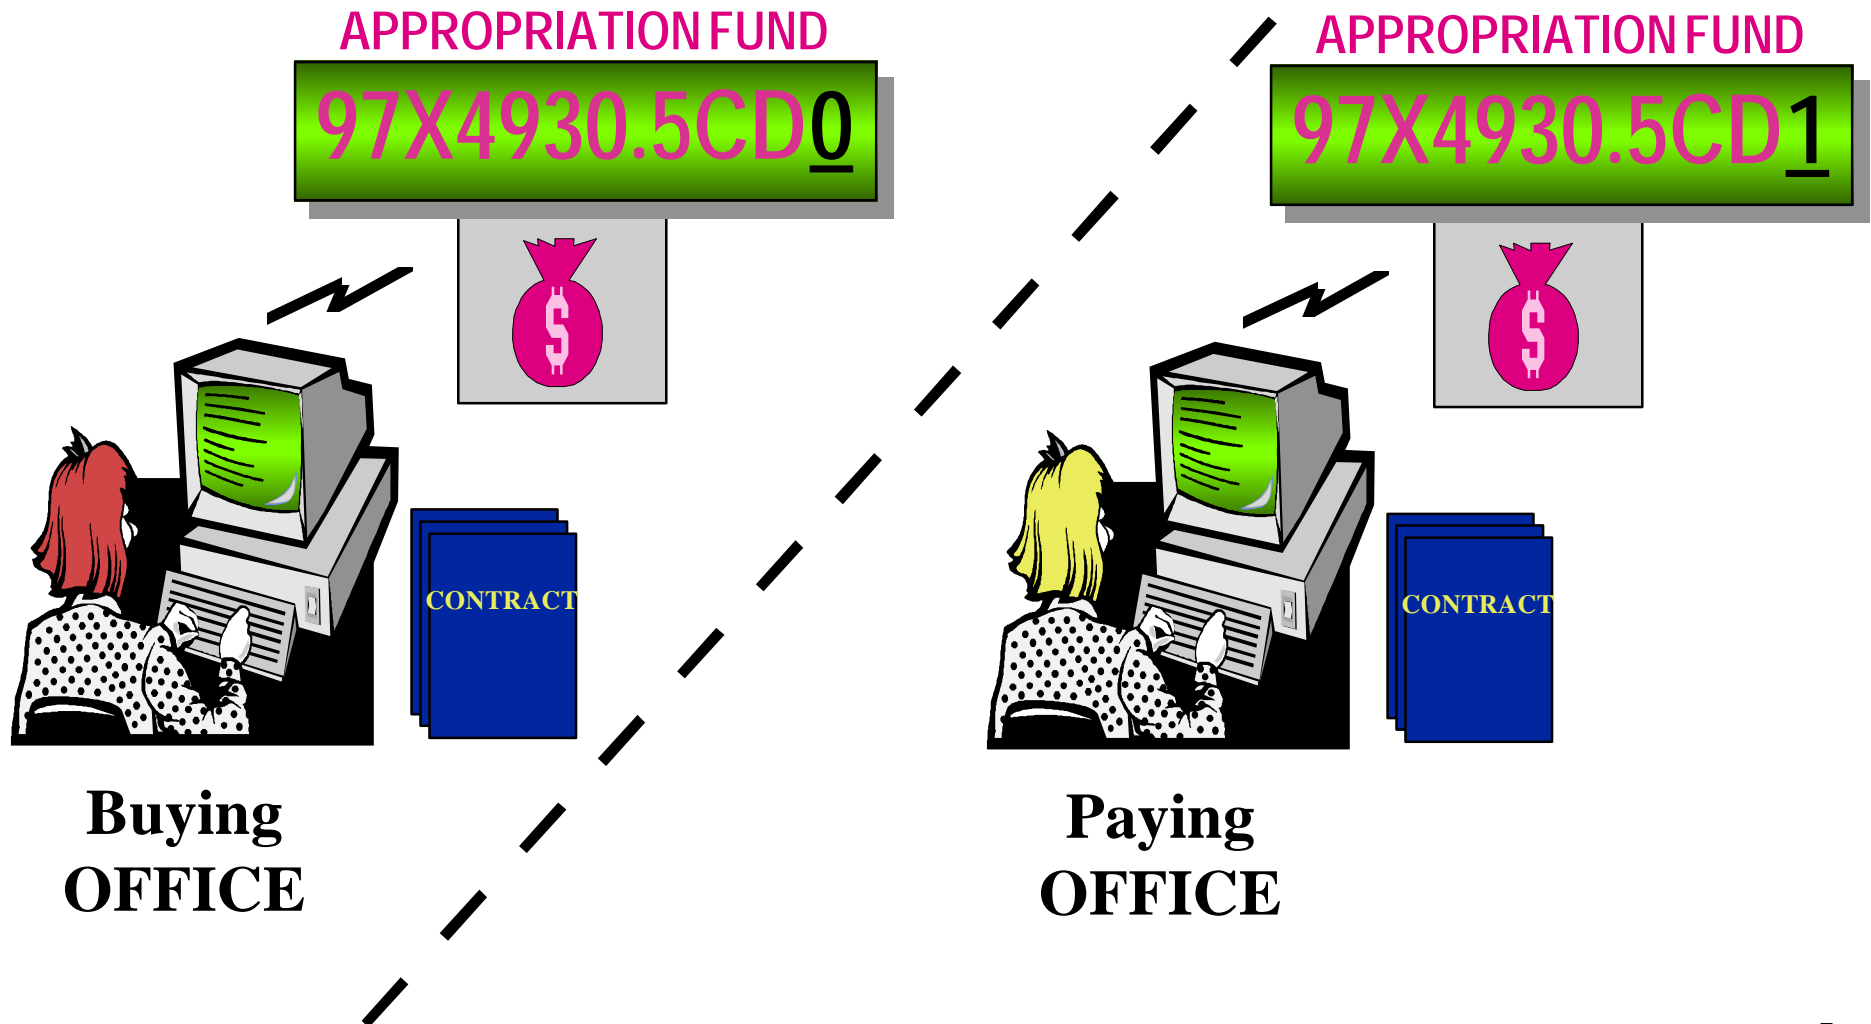

## *Contract Is Re-Keyed !*

# Rekeying Means Opportunity For Errors

# Payment Posted To Wrong Account

CHECK

97X4930.5CD1

97X4930.5CD0

97X4930.5CD1

## *An Expensive Mistake*

**1994: UNMATCHED DISBURSEMENTS  
12 BILLION DOLLARS**

**97X4930.5CD1**

**CHECK**

**97X4930.5CD0**

**Appropriation Account**

## ***Eliminate Redundant Updates***

# *Eliminate Geographically Dispersed Data*

**ADMINISTERING  
OFFICE**

# ONE SHARED DATABASE

**ADMINISTERING  
OFFICE**

## *Access To All DoD Contract Data*

# *Typical OLTP Database Design Based On Frequent Updates*

## **OPTIMIZED FOR UPDATES**

**Contract**

On-Line Transaction Processing (OLTP)

**Vendor**

**DoD  
Activity**

**Fund  
Cite**

**Mods**

**Line Item**

**Schedule**

**Update to  
Line Item**

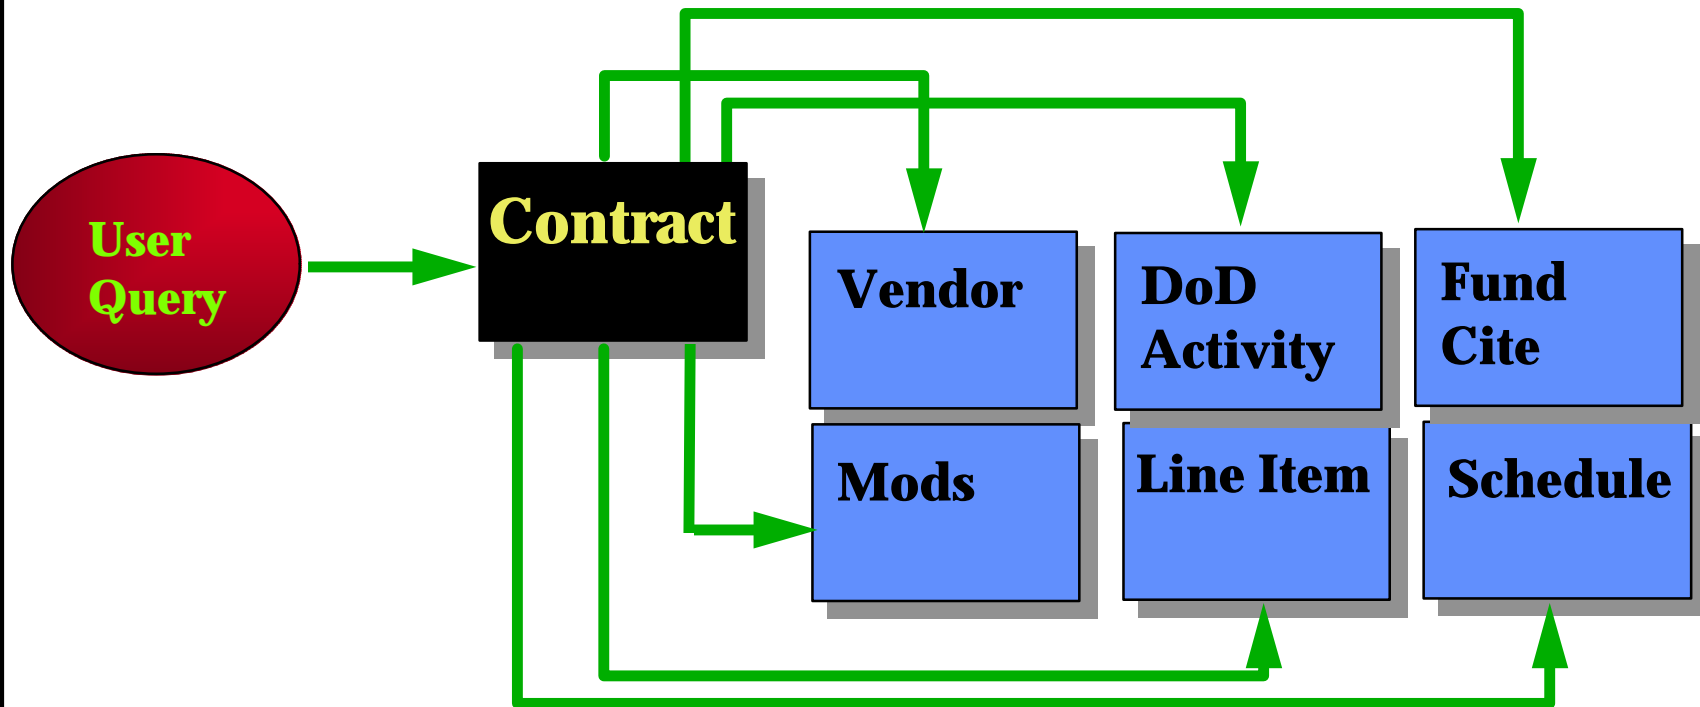

*Relational Database Structure*

## *Typical OLTP Database Design Slow For Query Processing!*

**On-Line Transaction Processing (OLTP)**

**OPTIMIZED FOR UPDATES (inefficient for query)**

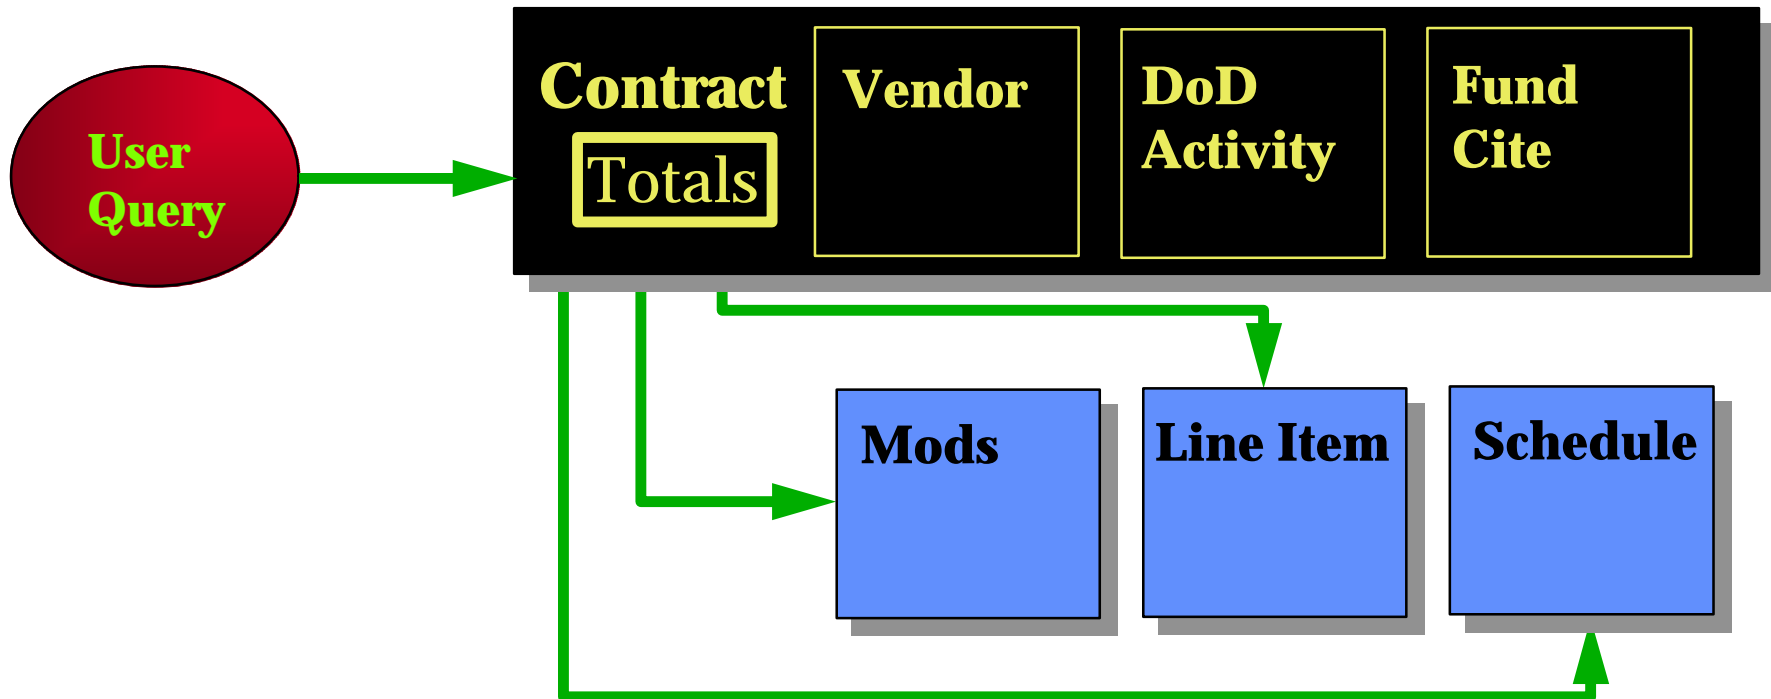

*Relational Database Structure*

## *Data Warehouse OLAP Database Design (denormalized & summarized)*

### MANAGED QUERY ENVIRONMENT

#### On-Line Analytical Processing (OLAP)

*Relational Database Structure*

## *Data Warehouse OLAP Database Design (highly summarized)*

### **OPTIMIZED FOR SLICING AND DICING**

#### On-Line AnalYTical Processing (**OLAP**)

Key: Line Item

Key: Contract

Key: Vendor

Key: DoD Activity

Key: Fund Cite

Key: Modification

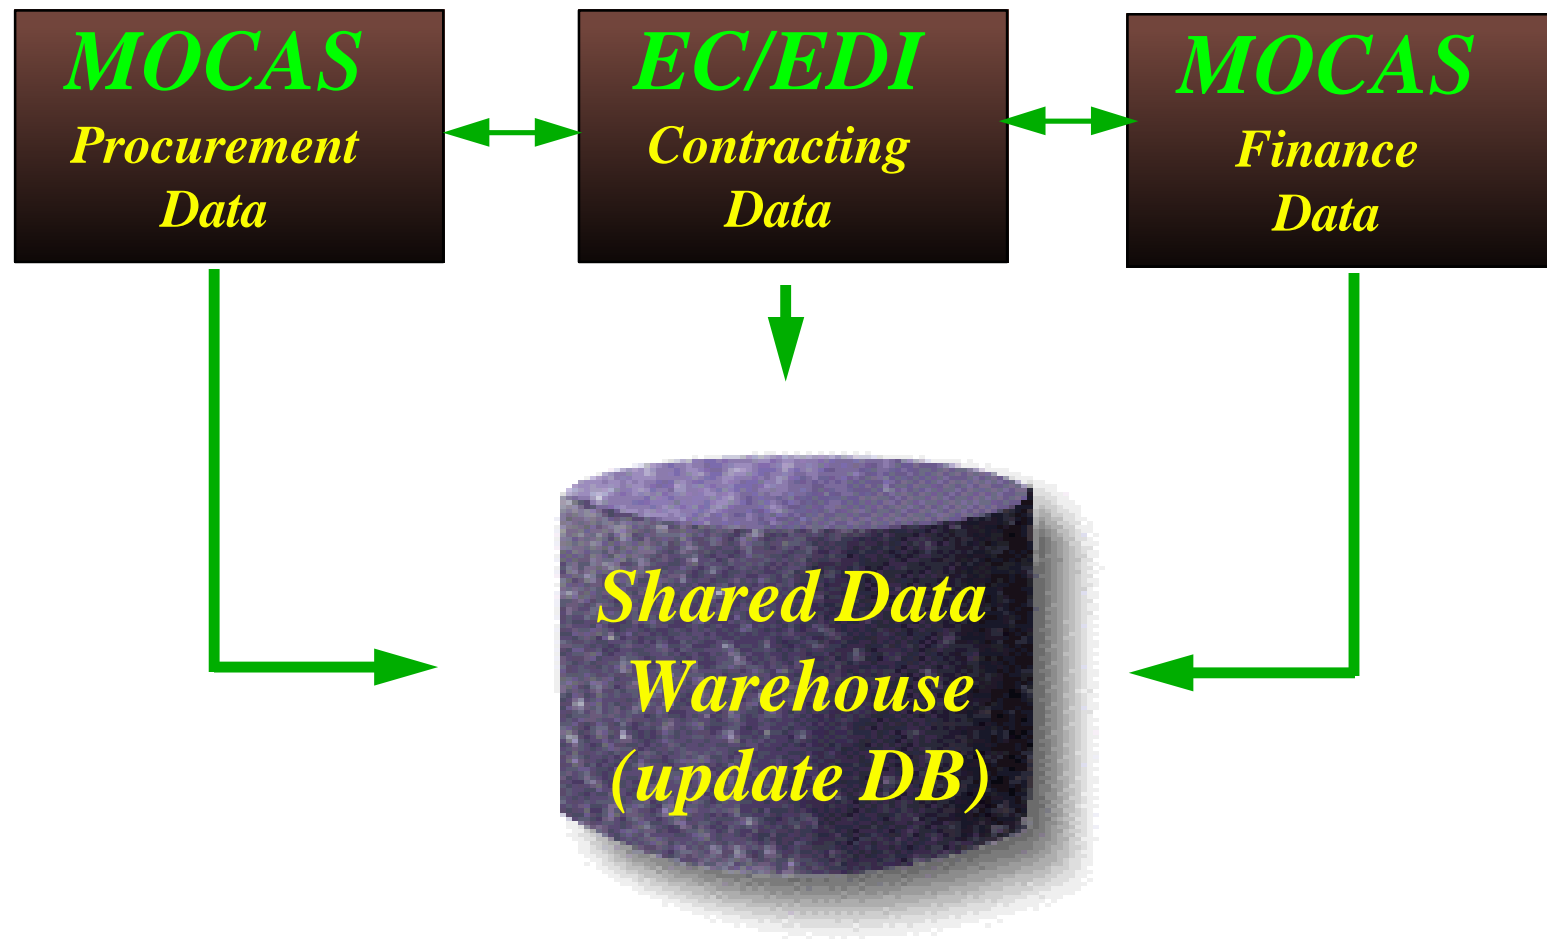

Key: Schedule

Key: Rec. Activity

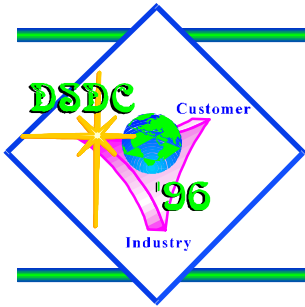

*Multidimensional Database Structure*

## ***SDW Will Create A New OLTP Database Structure***

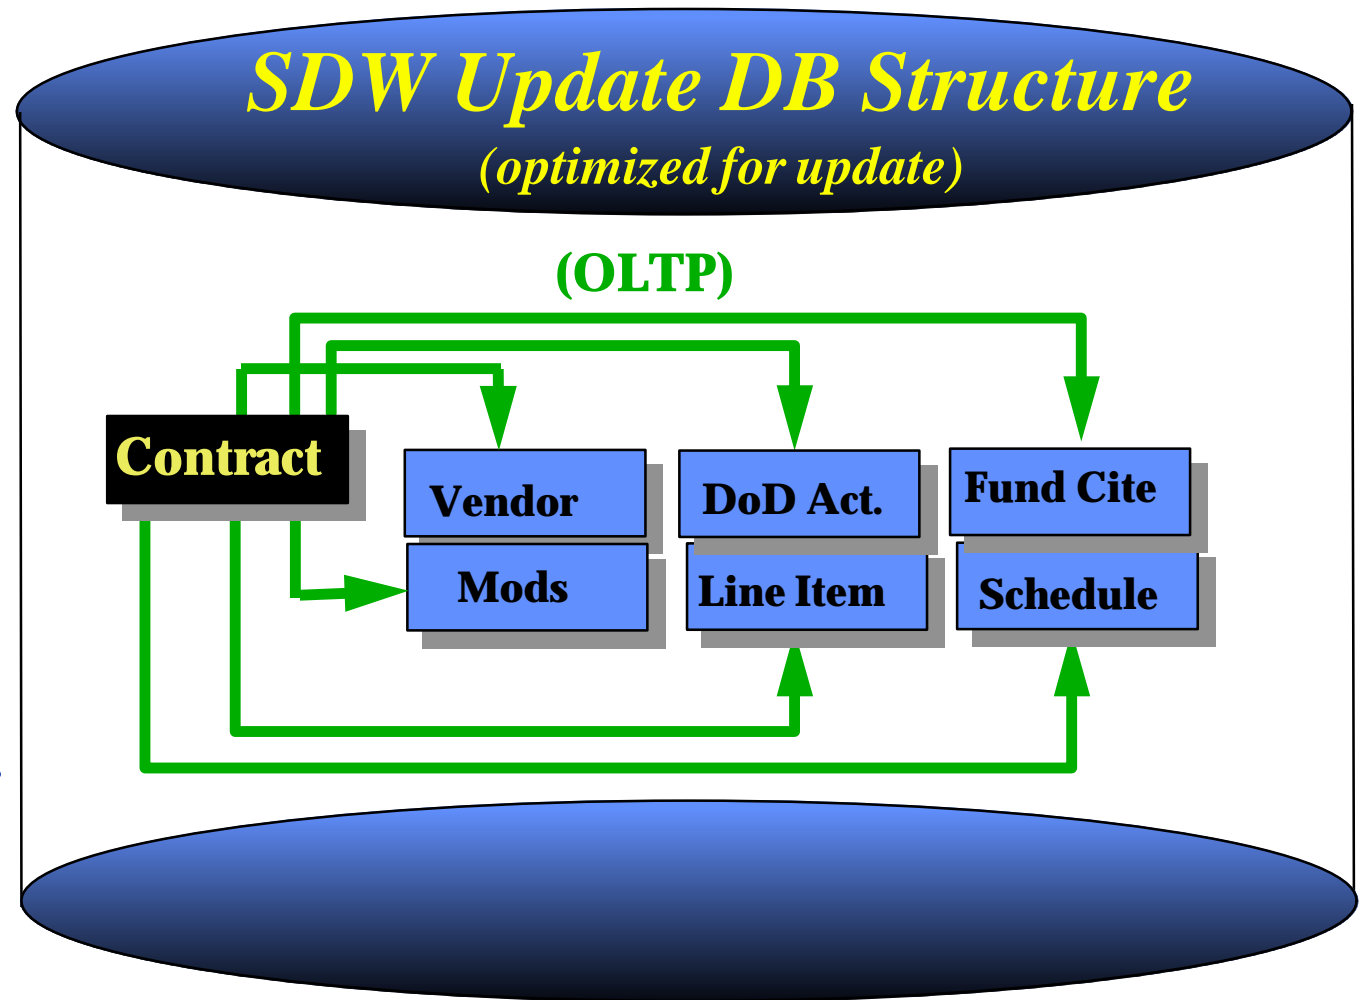

## ***SDW Will Not Use OLTP Structure For Query Processing***

***Queries  
Would  
Be Slow!***

***Detail data  
stored in  
many tables  
(normalization).***

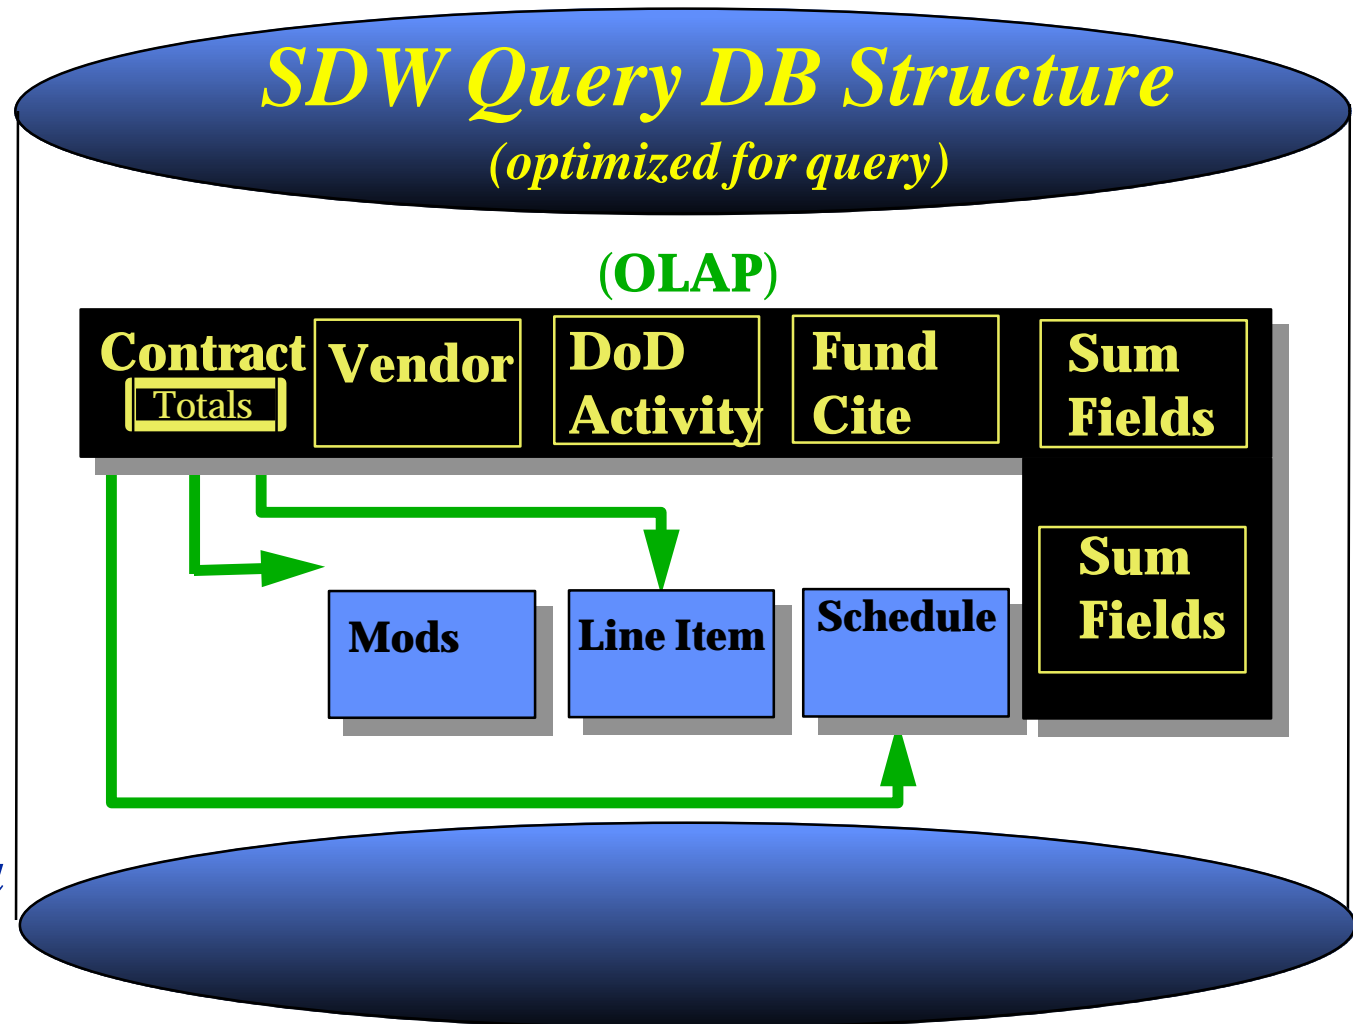

# SDW Relational On-Line Analytical Processing (ROLAP)

**Queries  
Are  
Faster**

**Detail data  
stored in  
fewer tables  
(de-  
normalization).**

**Moderately  
summarized data  
added.**

# ***SDW Multidimensional On-Line Analytical Processing (MOLAP)***

 ***Decision Support  
Queries Are Fast!***

 ***No Detail Data***

 ***Highly summarized data  
instead of moderately  
summarized data.***

# DATA & DATABASE TYPES

## Transaction Processing

*(optimized for update)*

**Update  
Query**

*Relational*

*Relational*

*Multi-  
Dimensional*

## Data Warehouse

*(optimized for query)*

**Query**

# SDW ENVIRONMENT

## *Production Database*

## *Data Warehouse*

### OLTP

*Relational*

### ROLAP

*Relational*

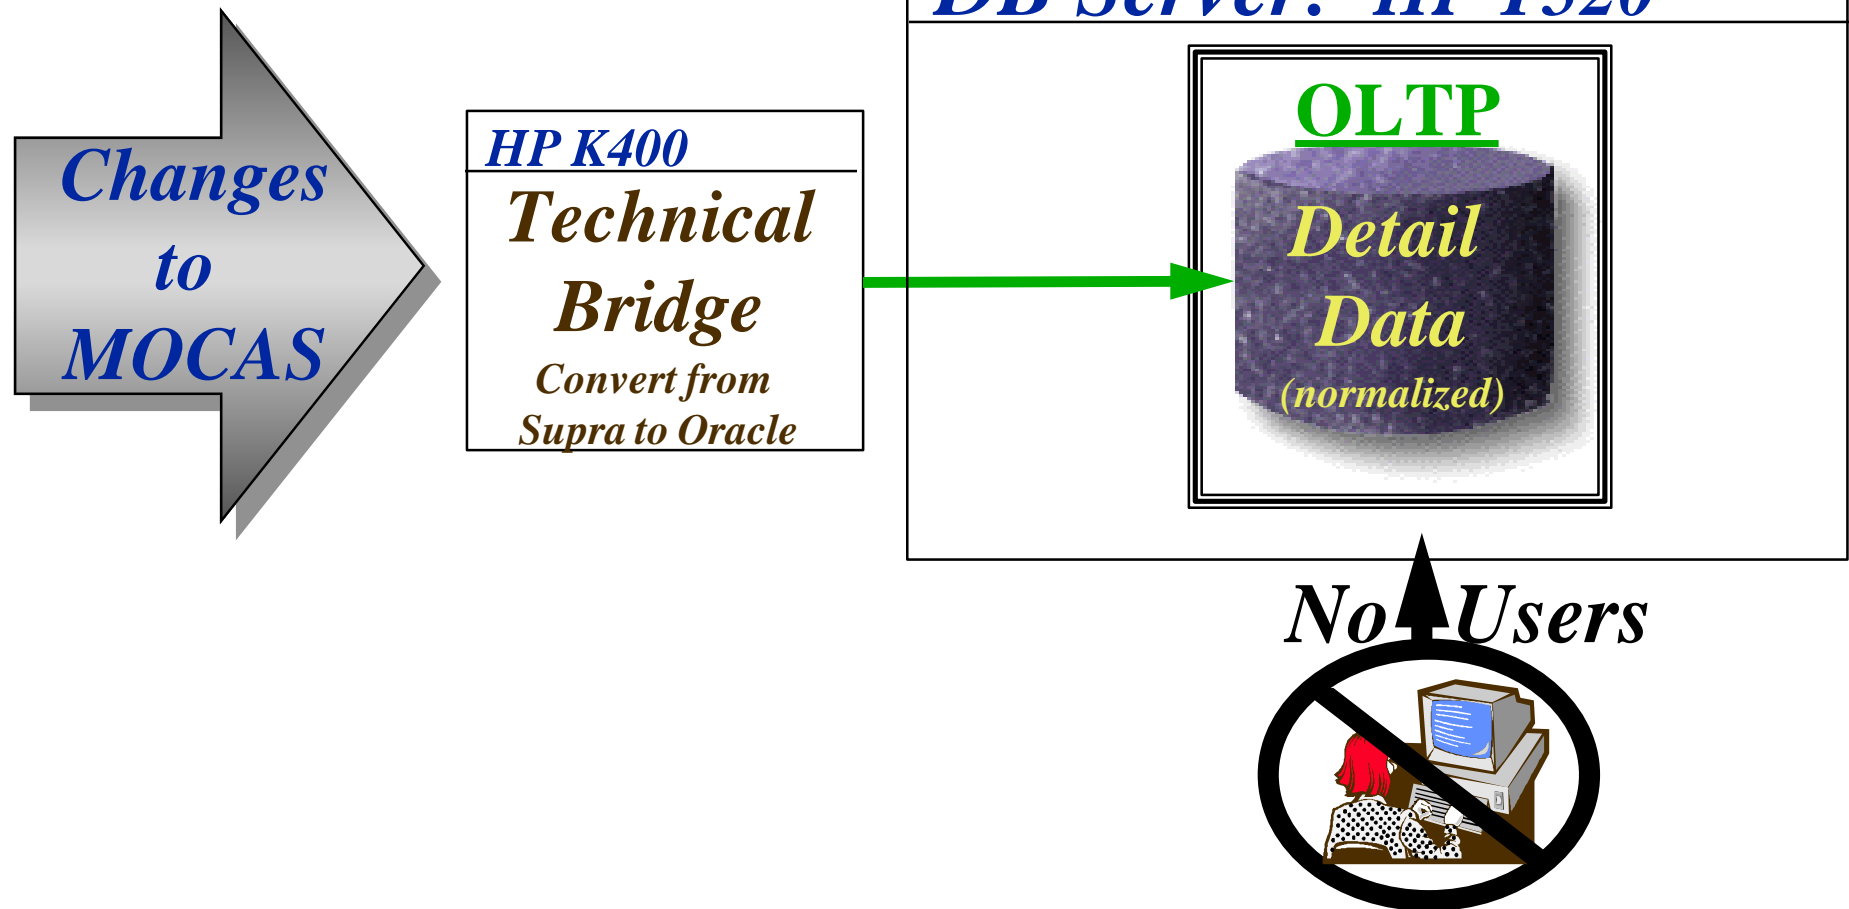

### MOLAP

*Multidimensional*

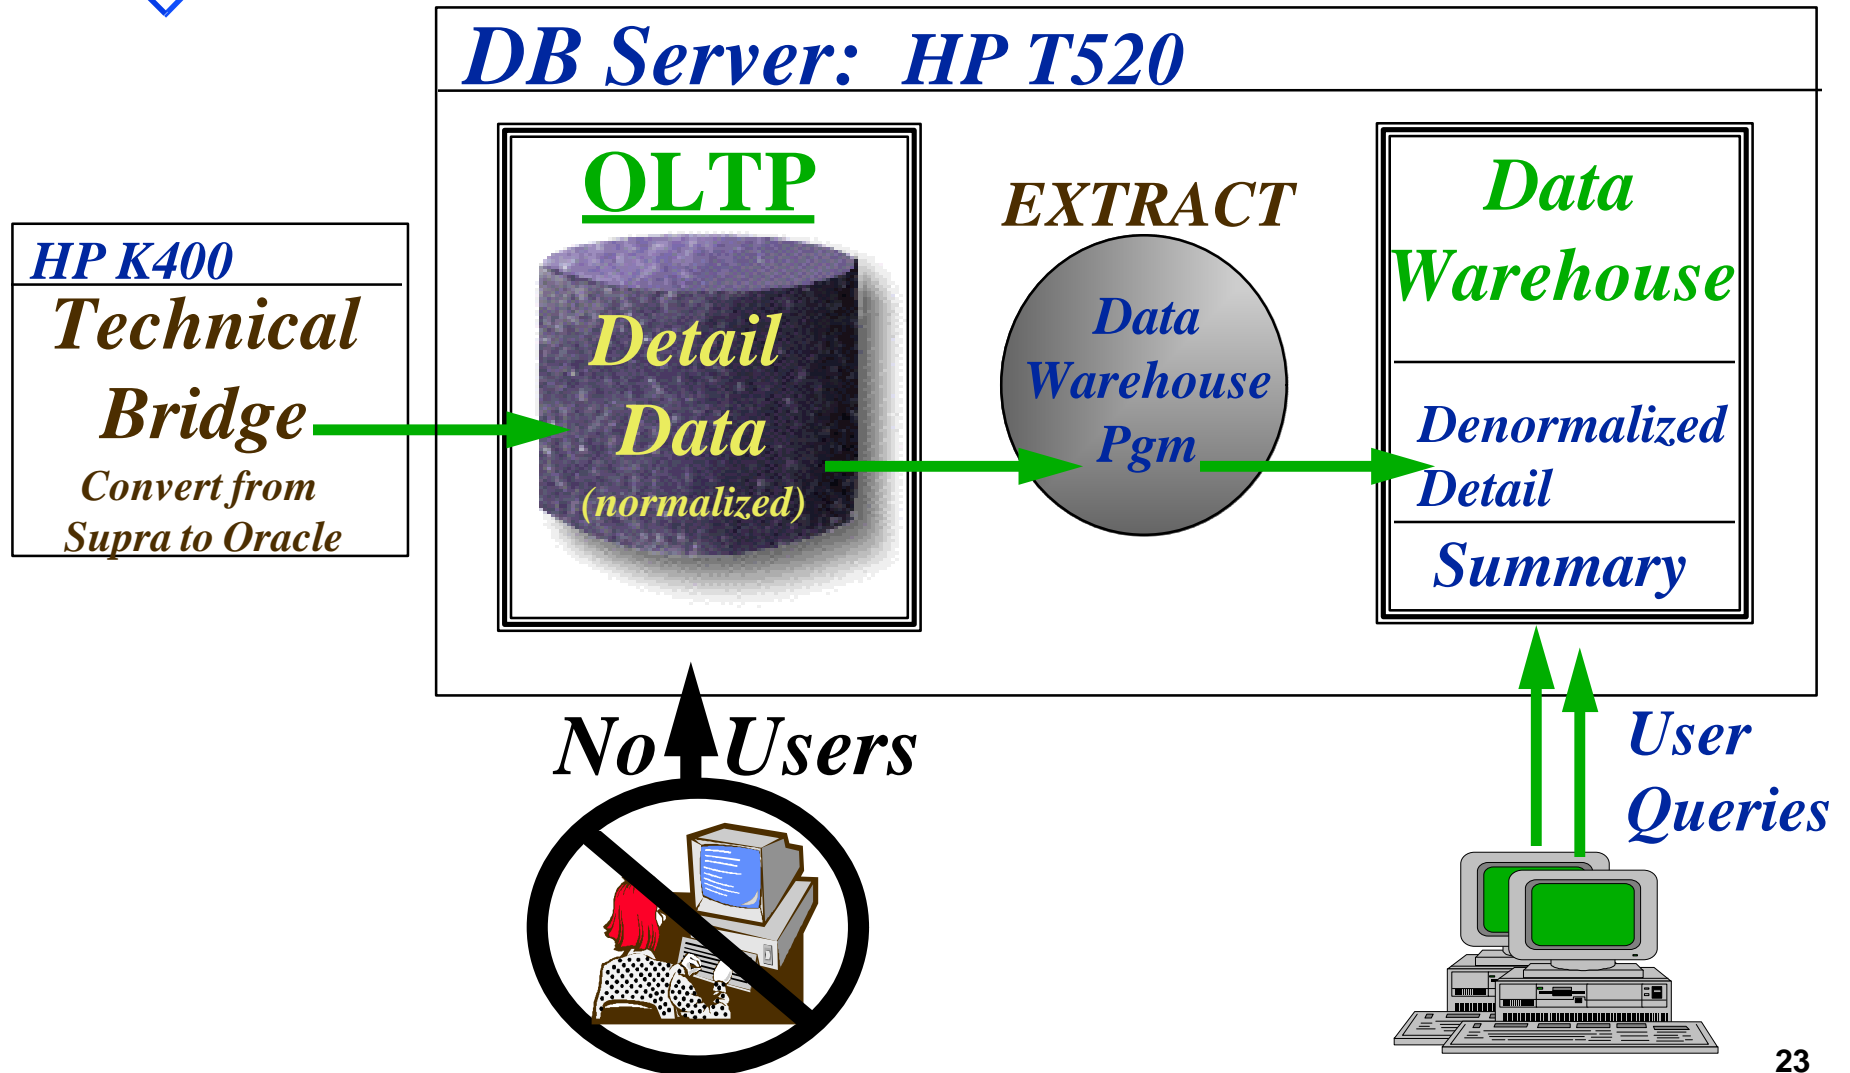

## ***SDW ENVIRONMENT (MOCAS to SDW OLTP)***

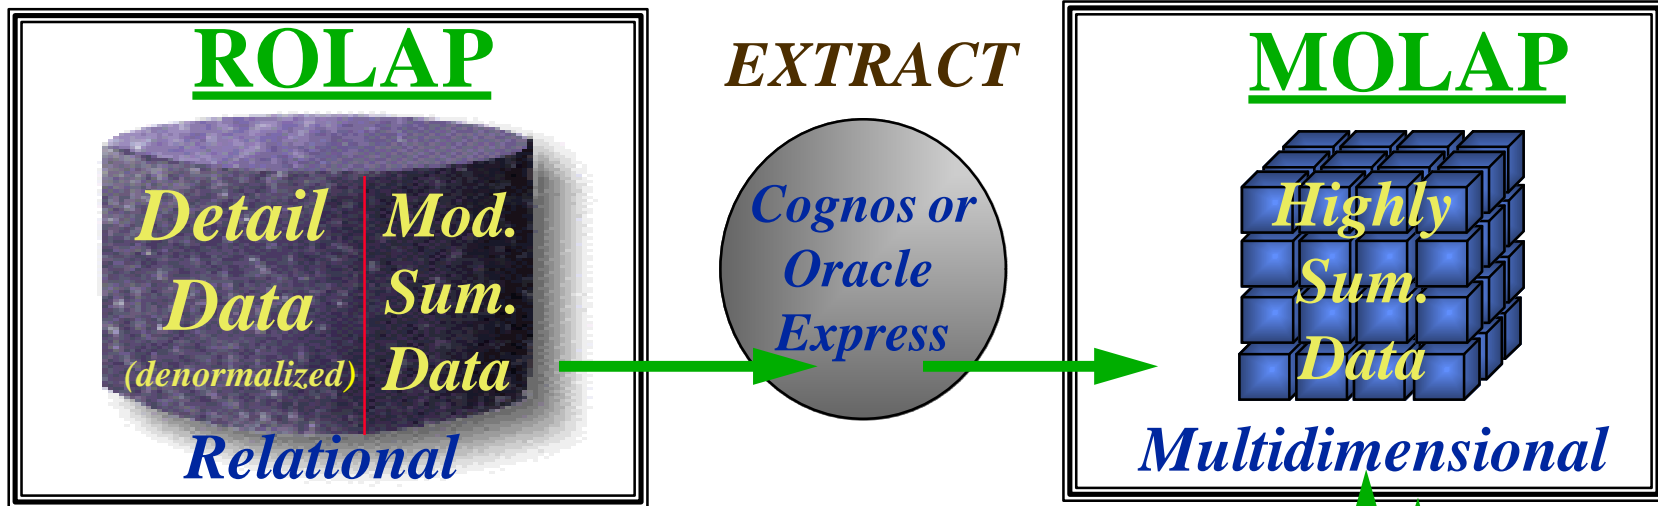

# SDW ENVIRONMENT (OLTP to Data Warehouse (ROLAP))

# SDW ENVIRONMENT (ROLAP to MOLAP)

*DB Server: HP T520*

**MOLAP**

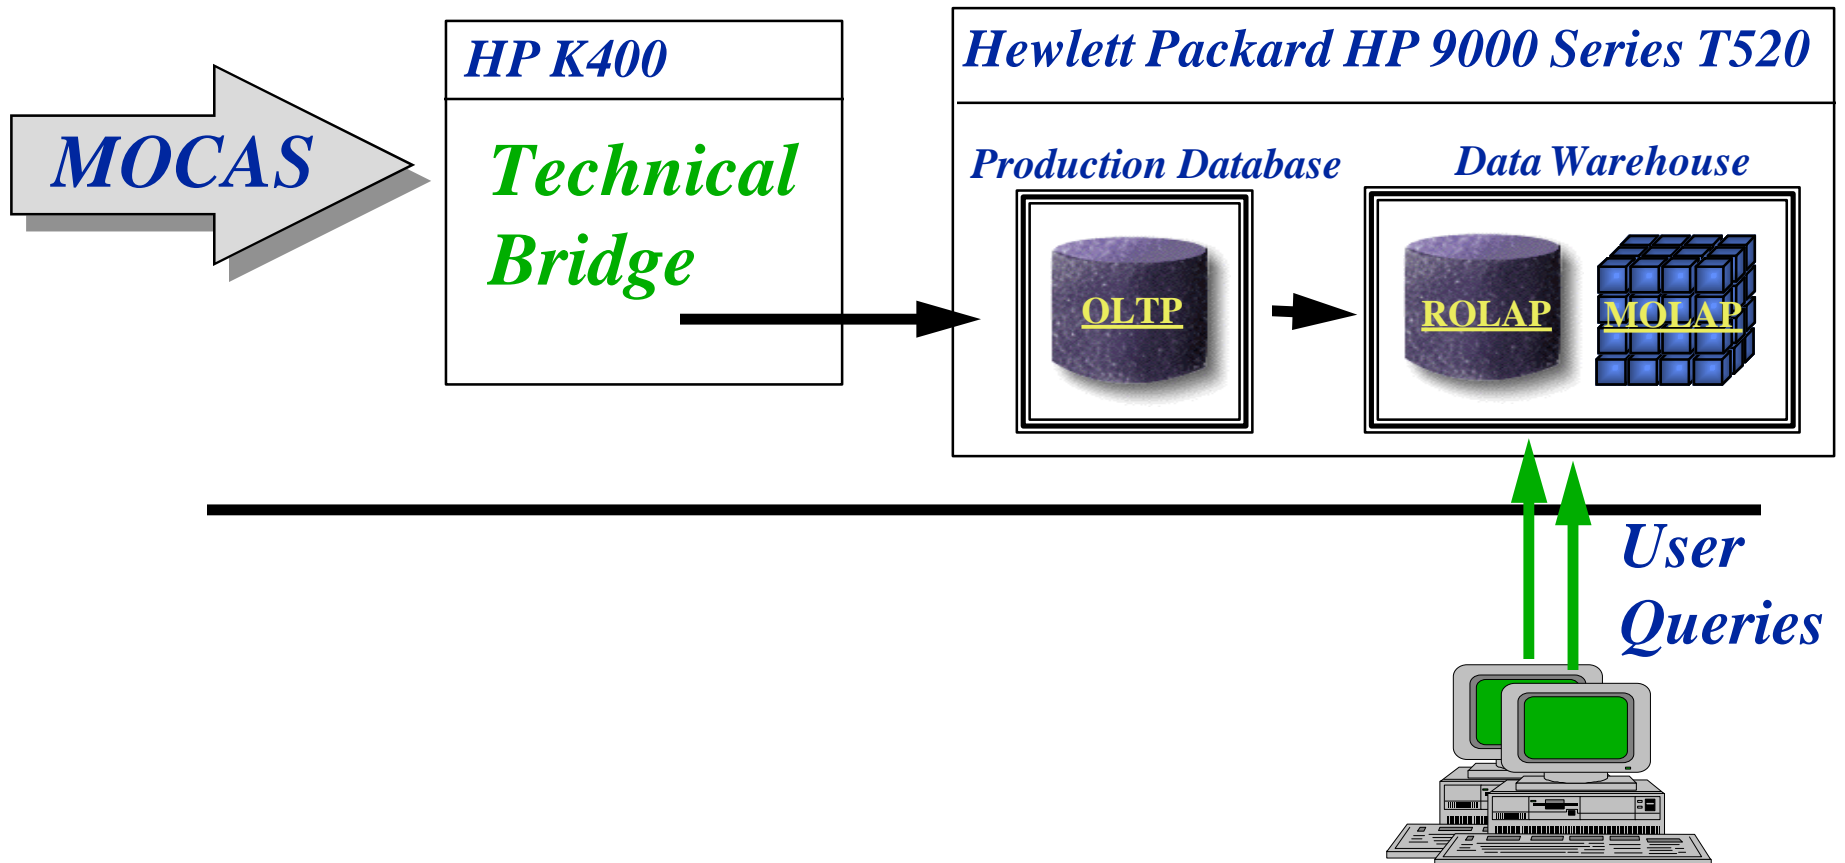

**Cognos**

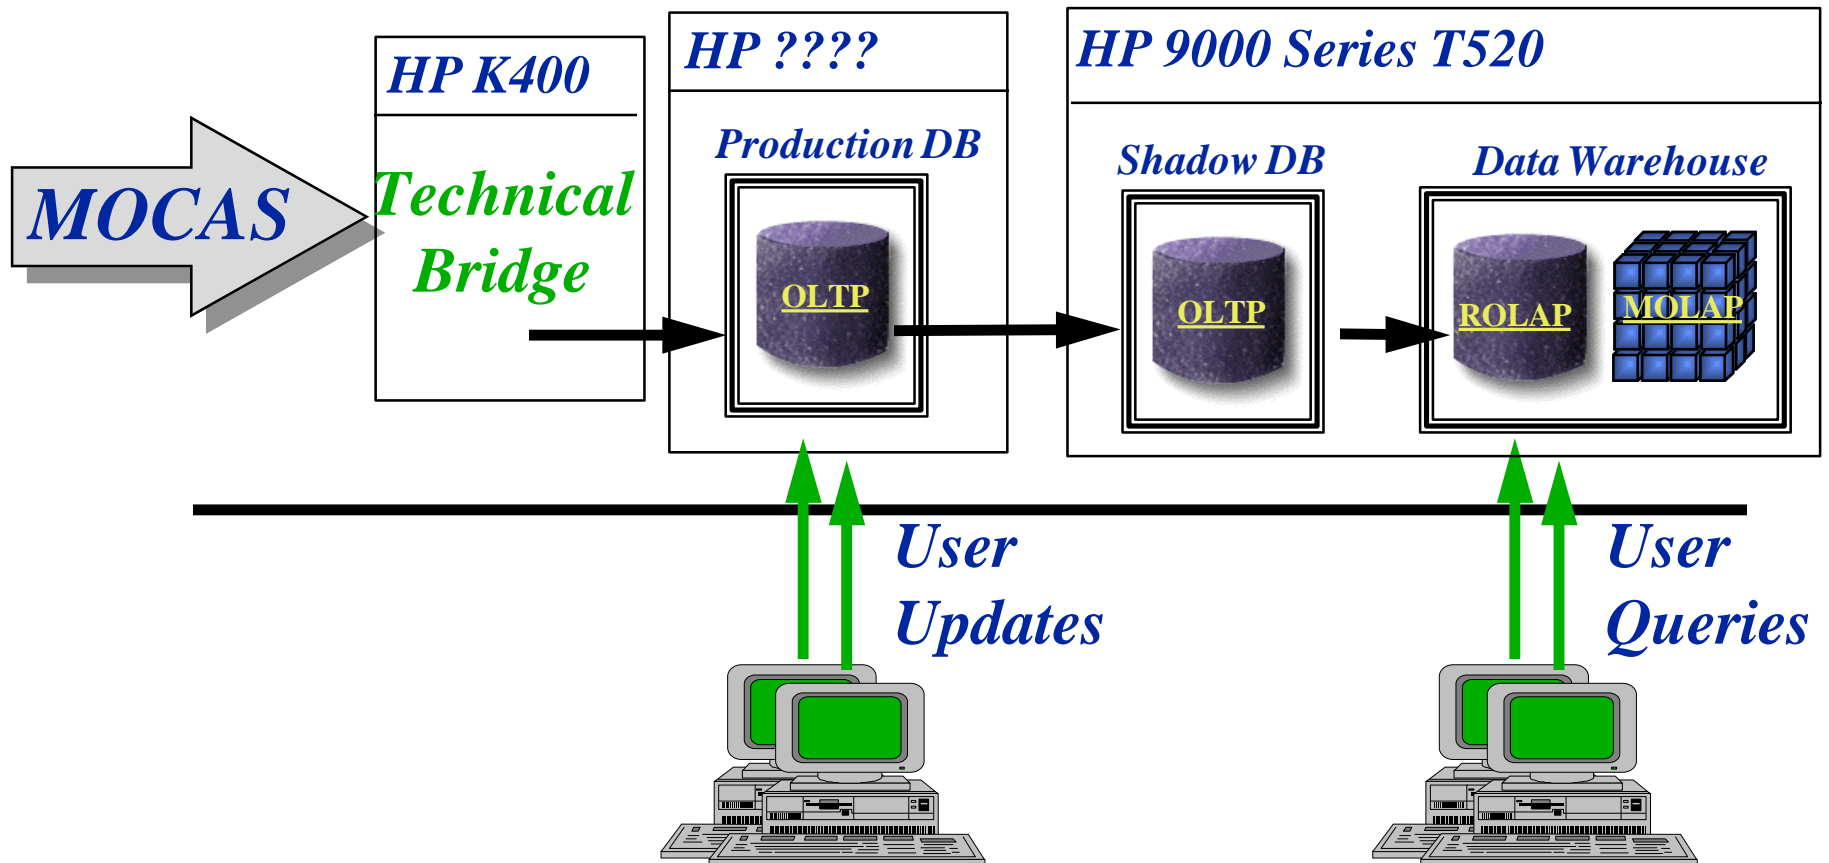

# SDW ENVIRONMENT (Query Only)

# SDW ENVIRONMENT

## (Production Version - Update & Query)

# SDW Database Server Technology

The SDW Database Server  
is a *Symmetrical Multi-Processor*  
(SMP)

*SMP*

 **SMP is FASTER than MPP.**

In the future, the SDW  
Database Server could migrate  
to a *Massively Parallel Processor*  
(MPP)

*MPP*

 **MPP handles more processing  
than SMP.**

## ***SDW Database Server without Parallel Query***

**All tasks within a  
query waiting for a  
single processor**

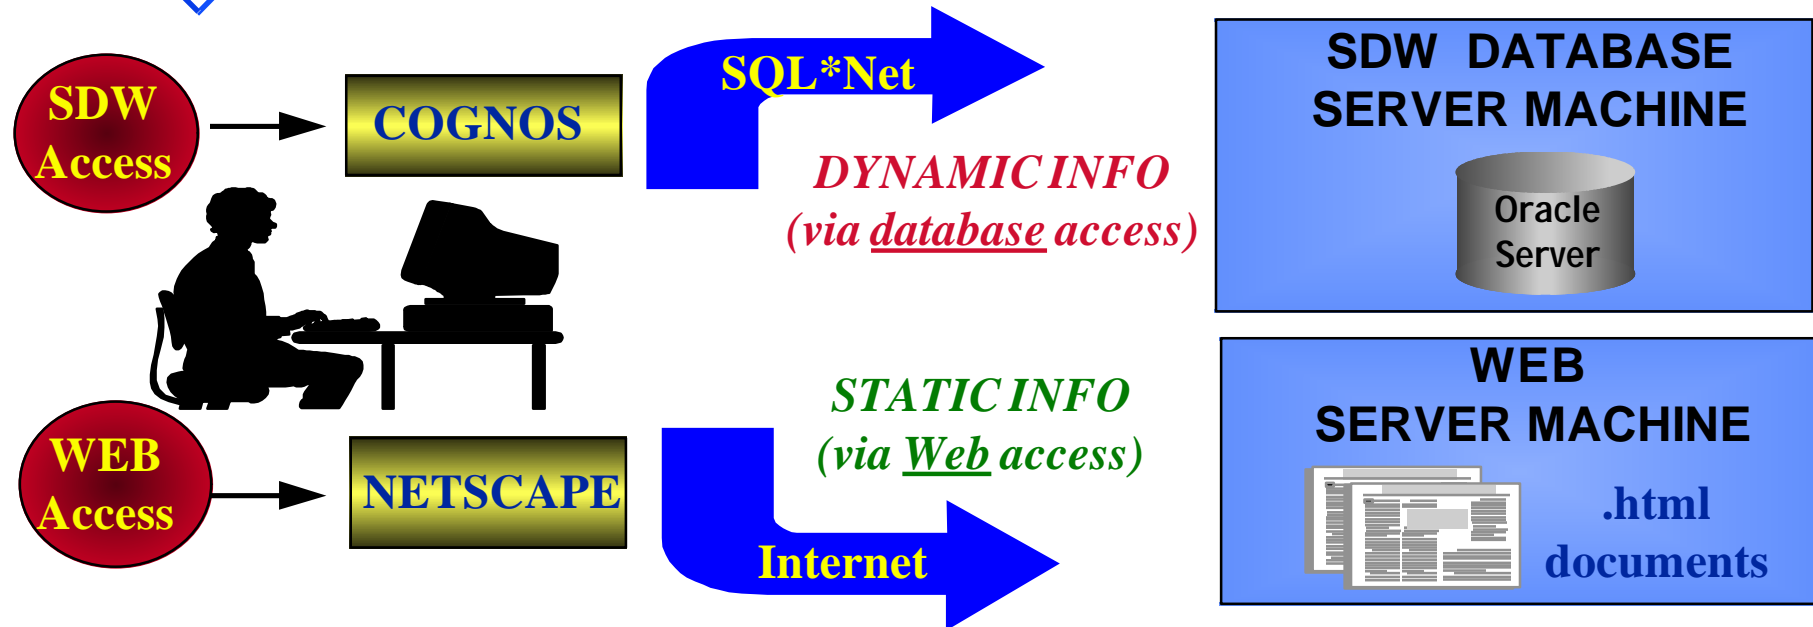

## ***SDW Database Server with Parallel Query***

**Each task within a  
query being executed  
by a separate CPU.**

## SDW Database Available Via The Web

### Data Available Via The Web Directly From SDW DB!

# ***SDW Summary***

**Update Contracting Database**

**Query Data Warehouse (detail & summary data)**

**Decision Support Data Warehouse (highly summarized data)**

**Decision Support System (DSS) Prototype**

**SDW Database Access Via The Web!**
